

Yorkhill Muscle Fund

For Children With Neuromuscular Disorders

IMAGINE...

Imagine your child was diagnosed at age four with a muscle wasting disease that predicted mortality in their early twenties....

Imagine your child would slowly but surely lose their ability to run, play, climb and walk....

Imagine they were confined to a wheelchair. All day every day....

Now imagine that wheelchair in which your child lives is totally unfit for purpose. Not even enabling them to readjust their body position, the way you or I do without thinking....

Imagine that your child gets so uncomfortable that they have to be taken from school during the day to be laid and turned by their parents....

Imagine how you would feel if that was your child and you had to accept the standard NHS wheelchair knowing that there was something better out there but you did not have the money to buy it. How would you feel.....

Yorkhill Muscle Fund was set up to purchase specialised powered wheelchairs, currently not provided by the NHS, to support research and offer practical help to local children and their families.

Thank you for helping to make a difference.
